JOHANNES KEPLER  
UNIVERSITÄT LINZ

### About the conference

Recognizing the digital transformation processes based on Artificial Intelligence reveals fundamental concepts about the structure of our world and the way we design our living and digital artefacts. Why not fuse digital and human-driven approaches to realize their collective creation capabilities? At the conference

we are interested in how ART raises awareness for this fusion and how we will find a dialog along crossroads of disciplines. The envisioned learning journey will intensify reflective practice to become well versed in co-creating digital realities, taking into account structural and system(ic) particularities.

### Fees

From July 1<sup>st</sup>, 2019: € 490,- (+ 20% VAT)

### Venue

TABAKFABRIK LINZ  
Peter-Behrens-Platz 6, 4020 Linz

### PROGRAM

#### Fishing on Friday

- Which competencies could lead us?
- Backbones in transient settings
- Do we need organisation(s) or which kind do we need?
- Self-organizing emergence
- Who shapes whom? Crossing-over of intelligences

#### Diving on Saturday

- Production as a Service
- Arts or Crafting?
- Robots and workforce as singular entity / co-creation?
- Humanizing robots / digital humans?
- Encoded agility as major impact?

#### Coming Up on Sunday

- The Me and digital identities
- Profiling future work and business
- Commoning in an increasingly diversified world
- Consultancy as engineering task or co-creating art?
